State-Owned **Mines Urged** For Britain

Take All Mineral Rights

LONDON, June 22.—Four reports of the coal commission which has been considering the question of nationalization of British mines have been published. The main report, by Justice Sir John Sankey, alone recommends immediate legislation for acquisition of fifty persons a week."

This, he asserts, would lodge with Director Densmore power to deprive states of all subsidies and that it is "unworkable and ridiculous."

He also criticises Mr. Densmore's management of the service in New York and elsewhere, and charges that the "funds were squandered."

"One office," he saserts, would lodge with Director Densmore power to deprive states of all subsidies and that it is "unworkable and ridiculous."

He also criticises Mr. Densmore's management of the service in New York and elsewhere, and charges that the "funds were squandered."

"One office," he says, "with fifty-three employes, during the first ten weeks of its existence placed less than fifty persons a week." mmediate legislation for acquisition of mines, royalties for the state and for owners to receive just compensation. t also recommends the immediate ap-

It also recommends the immediate application of local administration of mines through local, district and national mining councils, and legislation for acquiring mines after the plan has been worked for three years, with just compensation for owners. It is recommended that coal control be continued for three years.

The report of the miners' representatives generally agrees with that of Justice Sankey, but objects to provisions that would require the men to sign a contract not to combine to cease work until a question in dispute has been before appropriate councils. This report denies that the diminished output of coal is the fault of the men, and demands an immediate inquiry. The mine owners similarly request a hearing on the subject.

The owners' report argues that any form of nationalization would be detrimental to development of the industry and the conomic life of the country. It says no action so vitally affecting the whole nation should be taken with-

before appropriate councils. This report denies that the diminished output of coal is the fault of the men, and demands an immediate inquiry. The mine owners similarly request a hearing on the subject.

The owners' report argues that any form of nationalization would be detrimental to development of the industry and the economic life of the country. It says no action so vitally affecting the whole nation should be taken without referring the question to the community. The report recommends the establishment of a department of mines, which would be assisted by a system of councils, similar to those recommended by Justice Sankey. With a view to removing the difficulties arising from royalties, this report proposes that the state acquire ownership of the coal subject to the continuance of existing leases for at least sixty years.

The fourth report, written by Sir Arthur Drickham, recommends state acquisition of the entire mineral rights of Great Britain and the establishment of a Ministry of Mines with representation for labor on the directorate.

Below to Tity, June 22.—Resolutions are expected to be passed at tomorrow's session of the American Federation of Labor convention here, putting the organization on record as demanding a universal forty-four-hour week and as indorsing the telegraphers' strike.

Leaders to-night expressed the convection that the convention will indorse the forty-four-hour week, which has been thoroughly discussed by a special committee. The resolution bearing on the telegraph situation may possibly result in the Federation extending financial assistance to the strikers.

The convention is expected to adjourn to-morrow afternoon. Several jurisdictional claims remain to be disposed of. The convention probably will reaffirm its decision to fight the alleged opposition to trade union organization in the great steel mills of Western of a Ministry of Mines with representation for the difference of the convention probably will reaffirm its decision to fight the alleged opposition to trade union

Continuance of the Federal Employment Service which should cause the bill's defeat.

Section 3, he says, provides that three-fourths of the yearly expenditure of \$4,000,000 shall be distributed among the states in proportion to their population, while Section 4 sets up as an alternative method of distribution the subsidizing of each state in the amounts of the state appropriations. Attached to this last, Mr. Ernst adds, is the proviso that no state can get the benefit of it unless its appropriation each succeeding year is greater than that for 1918.

This, he asserts, would lodge with Director Densmore power to deprive states of all subsidies and that it is

purisdictional claims remain to be disposed of. The convention probably will reaffirm its decision to fight the alleged opposition to trade union organization in the great steel mills of Western Pennsylvania.

William Green, of the United Mine Workers, who was yesterday chosen fourth vice-president of the Federation, is chairman of the committee which

Foundation Makes Report Rockefeller Experts Help Greatly in Latin America

According to its report for 1918, issued yesterday, the Rockefeller Foundation cooperated with many Latin-American institutions for the improvement of public health organization. Its contributions to various war work agencies increased greatly during the year, so that since 1914 the foundation's total contributions have reached nearly \$22,500,000.

The foundation checked a yellow fever epidemic in Guatemala, made surveys and investigations in Ecuador and aided in the establishment of departments of research and teaching. The work in China was extended and a new medical centre is being built issued yesterday, the Rockefeller

Three Robbers Leave Her Unconscious After Taking \$1,700 Worth of Jewelry

Dorothy Davenport, twenty-five years old, daughter of F. C. Davenport, a Matbush real estate broker, was beaten and robbed at 3 o'clock yesterday morning at Avenue U and Flatbush Avenue. She was taken unconscious to the Kings County Hospital. Miss Davenport regained consciousness at 9 o'clock yesterday morning and insisted on being taken to her home, where she told her story to her father.

Workers, who was yesterday chosen fourth vice-president of the Federation, is chairman of the committee which has been considering the subject of the shorter work day. He refuses to announce the decision reached before it comes formslip before the convention. It was learned to-day, however, from other members of the committee that the recommendation will be for the forty-four-hour week, eight hours for five days of the week and a half day on Saturday.

The radicals in the convention have been out for the six-hour day. The leaders, however, frown upon so drastic a revision of working conditions at the present time. James A. Duncan, of Seattle, leads the faction which contends that the six-hour day will eliminate unemployment. The convention majority sees this condition relieved with the forty-four-hour week.

It was generally admitted to night that the striking telegraphers will have hard work to win their light. Percy Thomas, deputy president of the Commercial Telegraphers will have hard work to win their light.
